

## **SUBJECT: Declaration of Conformity, REACH Regulation, relating to the presence of highly hazardous substances.**

Updated Declaration due to entries added to the Candidate List\* on 17/01/2022

The regulation (CE) n. 1907/2006 (REACH) provides:

- Specific provisions for highly hazardous substances (SVHC) included in the Candidate List and substances subject to authorization.
- Restriction on manufacture, market introduction, and on the use of certain hazardous substances, mixtures and articles.
- Registration of all existing and new chemicals produced, or imported from non EU-countries above 1 ton/year.

In light of the declarations and information received from our suppliers, the company Trancerie Emiliane Spa certifies that the goods supplied:

- do not contain substances included in the Candidate List \* (SVHC) in concentrations higher than 0.1% by weight;
- Comply with the requirements relating to the substances listed in Annex XVI (Authorization);
- Comply with the requirements for substances listed in Annex XVII (Restrictions).

\*[echa.europa.eu] The Candidate List is subject to continuous updates. If substances listed in the Candidate List were present in our goods in concentrations higher than 0.1% by weight, we will promptly inform you as required by art. 33\* of the REACH Regulation.

\* The Article 33 of the REACH regulation provides that producers and importers of articles (products) are required to inform their customers of the presence of any substances of very high concern (SVHC) in products if in a concentration higher than 0.1% by weight, and, if so, provide instructions on the safe use of the product. Inform about the presence of SVHC in the products, within 45 days of the request by consumers or customers. Check the safety of the product, and its compliance with environmental requirements.
